Made through familiar craft processes

44 DESIGNS

Sheet forming + hand assembly

Cut and bend brass sheet into broad facets, folded boxes, channels and ribbon forms. Braze accessible seams, hem contact edges, dress joints and hand-buff the finish.

27 DESIGNS

Sand casting + hand finishing

Use broad relief, rounded roots and simple mould draw. Split complex forms into accessible parts. Dress cast surfaces and add separate sheet-made stone settings.

29 DESIGNS

Sand casting + sheet forming

Combine a folded sheet body with separately cast feet, plaques, crests or supports. Use broad joining pads and complete metal finishing before stone setting.

Stone setting & sampling

Use separate brass bezel cups sized to the actual stones, with protected backing and pavilion clearance. Keep stones outside the structural load path. Finish metal before setting; check retention, edges, joints and stability on physical samples.

Sizes are proposed starting dimensions. Production approval is pending physical sampling. Bowls and trays are for dry decorative accessories; vases use removable glass liners. Each SKU has a detailed route in the accompanying making register.
